This minor provides students with opportunities to learn and apply advanced strategies for writing academic, professional, and civic documents. Students examine the theoretical, interdisciplinary, and professional aspects of writing and develop their expository, persuasive, organizational, and stylistic skills through close analysis of rhetorical situations and the features and approaches of successful writing. The strong communication and analytical skills developed while earning this minor contribute to student success in a wide variety of professional careers as well as graduate education.

The minor is a valuable asset for students interested in working in media organizations, trade and professional associations, and non-profit organizations related to the arts, schools, and social change. It is also beneficial to students interested in careers in business, science, engineering, accounting, and many others that demand strong writing and communication skills for promotion and advancement.
